June 8, 2009: Former Marine officer and senior FBI official Don Sullivan has joined the Corporate Flight team as Vice President for Government Services. His primary responsibilities include expanding the firm's share of government service contracts in both domestic and international markets.

"Don has spent his entire public service career protecting and defending the nation," said CFM CEO Allen Howell. "He gained extensive knowledge of the resources required to accomplish specific missions and maintain ongoing operations. Don's knowledge and access will provide Corporate Flight with a considerable competitive edge," Howell said.

Sullivan graduated from the Georgetown University School of Foreign Service in 1977. He served as an officer in the U.S. Marine Corps from 1978 to 1981, commanding tank and anti-tank units. He entered the FBI as a Special Agent in 1983, serving in offices in Mobile, Alabama; New York City; Washington D.C.; Knoxville and Nashville, Tennessee. He retired from the FBI in January 2009. During his FBI career, He served in both investigative and management capacities.

Sullivan worked both criminal and intelligence matters. However, most of his career was spent working counterintelligence investigations, often working closely with elements of the State Department, Department of Energy, NASA, the Defense Department, the Department of Homeland Security, the Intelligence Community, many other government departments, and many foreign military, intelligence, and security services.

"Corporate Flight Management is among the most innovative firms in the transportation and logistics industry. I am looking forward working with Allen Howell and the team to build on their remarkable record of success," said Sullivan.

Corporate Flight Management, Inc. is a global aviation resources firm. CFM provides charter, aircraft management, maintenance, ground support, infrastructure development, aircraft sales, pilot training and financial services. The firm is based in Smyrna, Tenn.
