Corporate Flight Management Launches Executive Class from CFM

In response to record demand for executive aircraft Corporate Flight Management has begun acquiring retired BAE Jetstream airliners for conversion to executive configuration. According to Blake Tumbleson, VP Aircraft Sales, this twin turboprop commuter consistently delivers superior performance and reliability.

“Corporate Flight has been operating Jetstreams in our charter fleet for more than a decade. In that time, passengers, pilots, and mechanics have grown to appreciate this rugged and dependable aircraft,” Tumbleson said. “Our executive class conversions are built on a solid foundation of operational experience and customer acceptance.”

The CFM executive class conversion process empowers clients to direct the creation of an aircraft that suits their taste and mission requirements. From beginning to delivery owners are partners in every aspect the process.

In addition to custom exterior paint options, the owner may choose specific interior configurations including plush leather reclining seats, a refreshment center and lavatory. Moving map and Airshow video systems are available options as well. The instrument panel may be upgraded to include partial or full EFIS packages. Generous internal luggage storage may be augmented with installation of an external belly pod.

Post delivery, Corporate Flight Management provides owners with options such as an ongoing maintenance management program, and aircrew training. Access to the company’s entire charter fleet is available to owners placing their aircraft on charter with CFM.

“Choosing Executive Class from CFM will provide businesses and individual owners with opportunities to acquire cost effective, mission ready executive aircraft along with the full range of Corporate Flight Management’s Platinum level support services,” Tumbleson concluded.

Corporate Flight Management, Inc. is a multi national aviation services firm. The company provides, charter, maintenance, ground support, aircraft sales, training, infrastructure development and consulting services. Company headquarters are located in Smyrna (Nashville) Tennessee.
